- Equipment Services
- Sewer Line Maintenance
- Public Works Administration

1st Street NW Reconstruction

Work on the 1st Street NW reconstruction project is well underway. 1st Street NW is being reconstructed from the north side of Bremer Avenue to the south side of 5th Avenue NW.

The project involves new concrete pavement that is designed and built to withstand higher volumes of vehicle and truck traffic.

New aggregate subbase as viewed from Bremer Avenue.

Eagle Ridge Drive Extension

The Eagle Ridge Drive extension will join to 8th Street SE providing a valuable paved connection to the City's new Cedar River Parkway for over 140 housing units.

This project allows the City to pave the 750-foot graveled section of Eagle Ridge Drive to 8th Street SE while vacating two small cul-de-sacs to be developed as private drives.

Undeveloped gravel section of Eagle Ridge Drive to be paved.

Public Services Center North Addition

Construction of the 21,230 square foot addition to the north of the Public Services Administration area at the Public Services Center for Operations & Disaster Response is quickly taking shape. The addition will house the Street Division vehicles and equipment which currently occupy building space intended for the Water and Sewer Line Maintenance Divisions.

This project will allow the Water and Sewer Line Maintenance Divisions to consolidate operations and vacate their current locations in the 106-year-old building next to City Hall and the equipment storage building at the Wastewater Treatment Facility.

Construction of the addition should be complete by the end of the year.

Contractor erecting the precast wall panels..

Cedar River Park Ballfield Construction

Phase 2 of the Cedar River Park Ball Diamonds project includes field improvements, fencing, final grading and permanent seeding, along with installation of a well and irrigation system. It also includes the construction of building foundations, walkways and paved parking lots.

Construction began in April 2021 and should be completed by September 2021. Watch for construction progress updates at waverlyia.com/leisure-services or [facebook.com/CityofWaverlyIA](https://www.facebook.com/CityofWaverlyIA).

Phase 3 of the project could begin in late 2021 and is set to include the construction of facility buildings and an inclusive playground.

Cedar River Park Ballfield construction progress.

Bituminous Seal Coat Program

The Bituminous Seal Coat Program is a road maintenance procedure that consists of the placement of oil and rock upon a street.

View the site map that shows all of the streets that will be seal coated this summer on Waverly's website at waverlyia.com/projects or stop by City Hall to view the map.

The majority of the work will occur on the north side of Waverly. This project will be completed by mid-August.

Contractor placing rock over oiled street. As soon as the rock has been placed on street, vehicles may drive slowly on the new surface.

Heat Safety Reminders

Practice HEAT SAFETY Wherever You Are

Heat related deaths are preventable. Protect yourself and others from the impacts of heat waves.

Job Sites

Stay hydrated and take breaks in the shade as often as possible

Indoors

Check up on the elderly, sick and those without AC

Vehicles

Never leave kids or pets unattended - LOOK before you LOCK

Outdoors

Limit strenuous outdoor activities, find shade, and stay hydrated

The temperature in your car can quickly become deadly!

Outside Temperature 80°

| HEAT EXHAUSTION | OR | HEAT STROKE |
|---|----|---|
| Faint or dizzy | | Throbbing headache, confusion |
| Excessive sweating | | No sweating |
| Cool, pale, clammy skin | | Body temperature above 103° Red, hot, dry skin |
| Nausea or vomiting | | Nausea or vomiting |
| Rapid, weak pulse | | Rapid, strong pulse |
| Muscle cramps | | May lose consciousness |
| <ul style="list-style-type: none"> Get to a cooler, air conditioned place Drink water if fully conscious Take a cool shower or use cold compresses | | <p>CALL 9-1-1</p> <ul style="list-style-type: none"> Move person to cooler place Cool using cool cloths or bath Do not give anything to drink |

2020 Annual Drinking Water Report

The Waverly Water Division is pleased to report that our drinking water is safe and meets federal and state requirements. For the reporting period covering January 1, 2020, to December 31, 2020, the water supplied by the Waverly Water Division did not have any water quality violations. It met the standards set forth by the Environmental Protection Agency (EPA) and the Iowa Department of Natural Resources (IDNR).

The Waverly Water Division routinely monitors for contaminants in your drinking water in accordance with federal and state laws. The state requires us to monitor for certain contaminants monthly, annually and some less than once per year because the concentrations of these contaminants are not expected to vary from year to year.

To view the complete report, you may visit the City’s website at www.waverlyia.com/water or stop by the Public Works Administration office at City Hall.
