7. Description

The Minnie Krumwiede House at 316 4th St SW is estimated to have been constructed in 1923 according to the Bremer County Assessor's records. Property transfer records show the parcel passing to the Waverly Lumber Co. on April 9, 1924; the *Bremer County Independent* noted on April 10th that a house would be undertaken by Waverly Lumber Co. in the 3rd Ward. The company resold the property to Leonard West on 9/20/1924.

Then, 17 months later, West sold it to Minnie Krumwiede most likely with the new house completed by either Waverly Lumber or West. Members of several generations of the Krumwiede family held it from 1924 until 1987. A slightly revised date of construction is ca. 1924. The house was known to be in place in 1927 based on the published Sanborn Map for that year (at right).

The Krumwiede House is an example of a vernacular Hipped Roof, 1-Story rectangular house form with a front gable roofed enclosed porch wing on the left half of the front facade. The house has an uncommon, locally manufactured concrete block form with a wider width than normal cast block from the 1920s. The house has low-pitched roof profiles with wide eaves and exposed purlins along the gable end. The house now has medium-width, clapboard style steel siding on the walls through careful installation of the siding has preserved some of the trim, especially the knee-brace brackets and window millwork in the front gable peak and the vertical lath design for the ventilation panels of the front porch balustrade.

Fenestration includes double-hung windows of various sizes and configurations. Craftsman Style upper sash have vertical lights, including the group of three 4/1 double-hung windows on the south façade, the pair of horizontal sash with five lights in the front-gable peak, and the cottage window north of the porch which has a large single-light sash with a transom containing eight vertical lights. The 1/1 porch windows do not contain vertical upper sash lights, which is consistent with the fact that the porch was originally not enclosed above the balustrade level.

The house has two detached garages, one built when house was constructed at the rear of the lot is a single-bay hipped roof building with steel clapboard cladding. The second is a double-bay garage built in 1990 constructed between the house and the original garage. Both are considered non-contributing because of alterations or construction date.

8. Significance

The Minnie Krumwiede House at 316 4th St SW derives significance as a contributing resource in the Sturdevant SW Historic District, which qualifies for the National Register under Criteria A (Community Development) and C (Architecture). Despite synthetic cladding installed in the late-20th century, the house retains its basic form, substantial millwork detailing, and most original windows. The historic district is a well-preserved collection of mid and late 19th century and early 20th century architectural styles and vernacular house forms located in Waverly's southwest residential neighborhood. The neighborhood developed as a middle class and working class residential district from the late 1850s through the mid-20th century. Both garages are considered noncontributing.

Historical Background for Waverly¹

Waverly was established in 1853 along the Cedar River in Waverly Township located in southeastern Bremer County. It was designated as the county seat for Bremer County the same year that the county was officially organized and was formally incorporated in 1859. Like most Iowa towns established before the Civil War, growth during the early 1860s was deferred until after the war came to a close. Waverly's first railroad, the Cedar Falls and Minnesota Railroad was extended to Waverly in 1864. Eventually track was also laid for other branch lines and an electric interurban. By 1917 track for branch lines was absorbed by the Chicago and Great Western Railroad and the Chicago, Rock Island and Pacific Railroad. Track for the electric interurban – the Waterloo, Cedar Falls, and Northern – was laid in 1910 but usage was never as substantial as predicted.

Waverly grew in the manner typical of other Iowa county seats in the late 19th and early 20th century. Its commercial center extended along the east-west route of Bremer Avenue on both sides of the Bremer Avenue Bridge that crossed the L-shaped course of the Cedar River as it passed through the center of town. The county courthouse was located outside of the commercial area on a slight prominence at the east end of Bremer Avenue. Residential districts grew up in the four quadrants formed by the intersecting main street and river. The broad, generally flat profile of both the business district and early residential neighborhoods saw the regular occurrence of flooding resulting in the gradual replacement of most first generation frame building stock. German immigrants were among the largest ethnic group to populate Waverly during the 19th century establishing religious institutions with ethnic affiliations such as St. Paul's Lutheran Church in the northwest quadrant, St. Mary's Roman Catholic Church in southeast quadrant, and the German Methodist Church.

Bremer County and its county seat of Waverly prospered during the late 19th and early 20th century becoming a retail and professional services center for Bremer County and sections of adjacent Butler County. The county's standing as the "Dairy Spot of Iowa," gave rise to a number of dairy industries including a manufacturing plant operated by the Carnation Milk Products Company for the production of condensed milk in the 1920s. Population stood at 16,300 people in 1900 before the growth rate slowed before World War I. By 1930 population topped 17,000. Expansion of a Lutheran seminary in Waverly first located in the community in 1879 through the relocation of Wartburg College to the community in 1939 was a cultural and economic stimulus for the community. Waverly continued to add a 1,000 people per decade until 1950 when the post-War boom saw growth accelerate to more than 21,000 by 1960. During the past 50 years population has slowed somewhat topping out at 23,325 in 2000.

Historical Background for the Minnie Krumwiede House at 316 4th St SW:

The Minnie Krumwiede House is located in the southwest quadrant of Waverly that includes additions platted by early Waverly settlers, Ira Sturdevant and his son William Sturdevant. The Sturdevant family moved to the unsettled area along the Cedar River in the mid-1850s. Ira received a 40-acre federal land grant based on his military service in the War of 1812. William acquired 80 acres of adjoining land to the north of his father's 40-acre parcel. In 1857 the William Sturdevant's Addition was laid out and in 1860 the Ira Sturdevant Addition was platted. Growth remained relatively slow in these subdivisions until after the Civil War.

The Krumwiede House was constructed in ca. 1924 while the parcel was owned by the Waverly Lumber Company. Property transfer records show the parcel passing to the Waverly Lumber Co. on April 9, 1924 and the following day, the *Bremer County Independent* noted that “ .” The company resold the property to Leonard West on 9/20/1924. There is no record of the house being occupied by the West family. Then, 17 months later, West sold it to Minnie Krumwiede most likely with the new house completed by either Waverly Lumber or by West. Members of several generations of the Krumwiede family held it from 1924 until 1987. They included Emma, Olinda, and Adele after Minnie transferred it to them in 1936. The deed, however, remained unrecorded until 1945 for this transfer. The three women held it jointly until 3/25/1987 when it was sold to George and Peggy Muckamal.
